Introduzione

Incontro, condivisione, crescita personale, sono alcune delle parole chiave che contraddistinguono l'offerta e l'impegno delle Biblioteche comunali che escono dal 2022 con alcune conferme e dati in ripresa dopo gli anni difficili della pandemia.

Superata, nel 2022, la quota di 300.000 iscritti, crescono gli utenti attivi, 26.000 persone, ovvero le persone che hanno effettuato almeno un'operazione nell'anno.

Continuano ad aumentare anche le presenze: dalle quasi 350.000 del 2021 alle più di 464.000 del 2022. Grazie all'inaugurazione della Sala delle capriate, la nuova sala lettura della Biblioteca delle Oblate, è aumentata anche la superficie a disposizione del pubblico.

Più di 25.000 sono le persone che hanno partecipato ai più di 1000 eventi (conferenze, presentazioni di libri, incontri con autori, dibattiti) rivolti agli adulti mentre per i più piccoli le biblioteche hanno organizzato 381 attività per famiglie (laboratori, letture ad alta voce..) che hanno accolto più di 5.000 partecipanti e 256 incontri con le scuole che hanno coinvolto 5.743 alunni. Le Biblioteche si confermano quindi un presidio culturale sul territorio e luogo di incontro, conoscenza e condivisione dei saperi organizzando quasi 1.700 attività culturali per un totale di quasi 39.000 presenze.

Le biblioteche anche come luoghi di formazione e aggiornamento. Nel 2022 si sono tenute 81 attività formative, come le consulenze digitali a cui hanno partecipato 2197 persone.

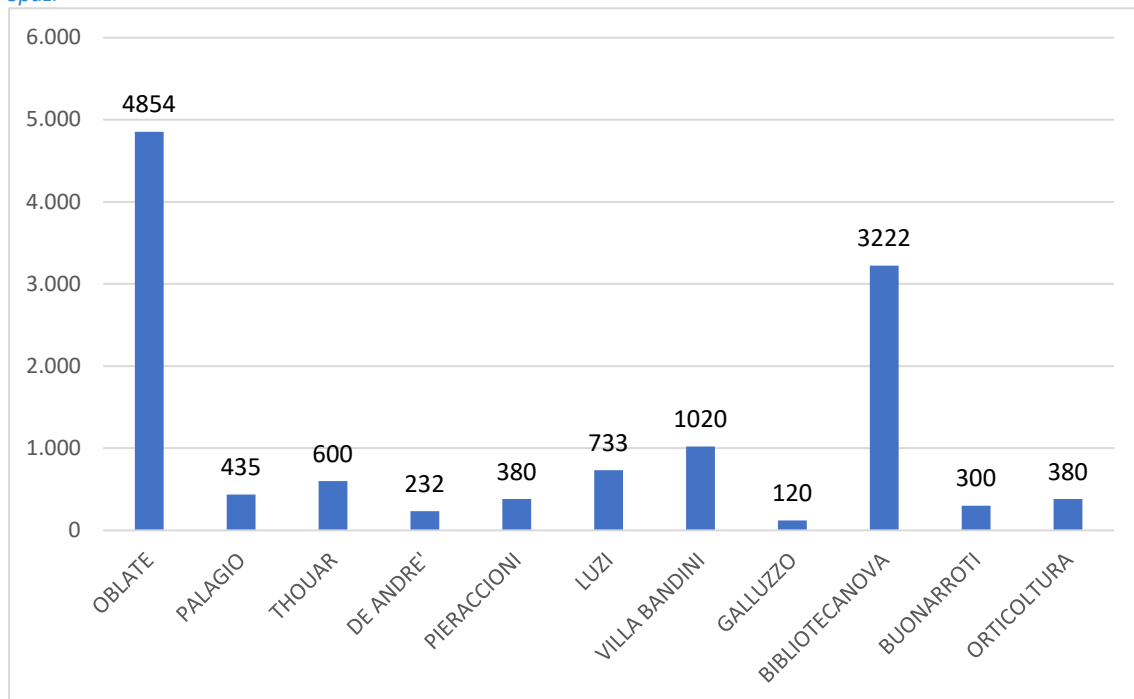

Tornano ad aumentare, in risalita rispetto al 2020, i prestiti: dai circa 126.000 del 2020, ai 180.000 del 2021, ci attestiamo nel 2022 ai 214.000 (nel 2019, prima dell'epidemia da Covid 19, le Biblioteche hanno prestato circa 280.000 documenti).

Le biblioteche: le risorse

La stima delle presenze viene effettuata ogni anno sulla base della rilevazione degli accessi in biblioteca, che viene fatta in tre settimane campione: una invernale (fine febbraio), una estiva (inizio luglio) e una autunnale (metà ottobre), in modo da avere tre settimane corrispondenti a tre momenti di frequentazione diversi. Le settimane vengono considerate "standard", ovvero settimane-tipo senza iniziative o eventi particolari che possano alterarne i valori in eccesso.

N° complessivo di presenze nelle Biblioteche Comunali Fiorentine 2010-2022 (su 3 sett.campione)

Andamento delle presenze distinte per biblioteche a partire dal 2010

Prestiti per classi Dewey 2022

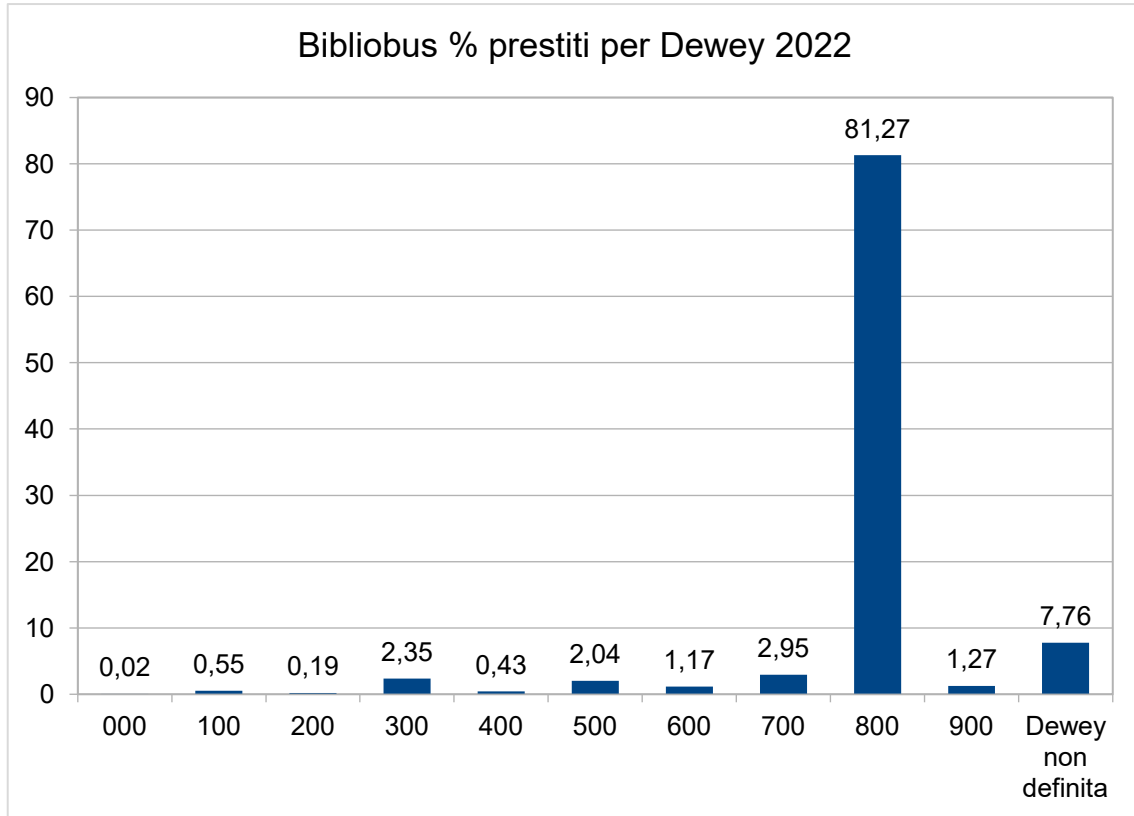

Orticoltura % prestiti per Dewey 2022

Leonardo Da Vinci (ex ITI) prestiti per Dewey 2022

Servizi esterni e il BiblioBus

1. The first step in the process of identifying a problem is to define the problem clearly and concisely. This involves identifying the symptoms, the scope of the problem, and the impact it is having on the organization.

2. Once the problem has been defined, the next step is to gather information. This involves identifying the sources of information, collecting data, and analyzing the information to identify the root cause of the problem.

3. The third step is to generate alternative solutions. This involves brainstorming ideas, evaluating the pros and cons of each idea, and selecting the most promising solution.

4. The fourth step is to implement the chosen solution. This involves developing a plan of action, assigning responsibilities, and monitoring progress.

5. The final step is to evaluate the results. This involves comparing the actual results to the expected results, identifying any gaps, and making adjustments as needed.

6. The process of problem-solving is an iterative one, and it may be necessary to revisit previous steps as more information is gathered or as the situation evolves.

7. It is important to communicate throughout the process, both internally and externally, to ensure that everyone is on the same page and that the organization is working together to solve the problem.

8. Finally, it is important to document the process and the results, so that the organization can learn from the experience and avoid similar problems in the future.

9. The process of problem-solving is a critical skill for any organization, and it is one that can be taught and learned. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

10. In conclusion, the process of problem-solving is a complex one, but it is one that is essential for the success of any organization. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

11. The process of problem-solving is a critical skill for any organization, and it is one that can be taught and learned. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

12. In conclusion, the process of problem-solving is a complex one, but it is one that is essential for the success of any organization. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

13. The process of problem-solving is a critical skill for any organization, and it is one that can be taught and learned. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

14. In conclusion, the process of problem-solving is a complex one, but it is one that is essential for the success of any organization. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

15. The process of problem-solving is a critical skill for any organization, and it is one that can be taught and learned. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

16. In conclusion, the process of problem-solving is a complex one, but it is one that is essential for the success of any organization. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

17. The process of problem-solving is a critical skill for any organization, and it is one that can be taught and learned. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

18. In conclusion, the process of problem-solving is a complex one, but it is one that is essential for the success of any organization. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

19. The process of problem-solving is a critical skill for any organization, and it is one that can be taught and learned. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

20. In conclusion, the process of problem-solving is a complex one, but it is one that is essential for the success of any organization. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

21. The process of problem-solving is a critical skill for any organization, and it is one that can be taught and learned. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

22. In conclusion, the process of problem-solving is a complex one, but it is one that is essential for the success of any organization. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.

23. The process of problem-solving is a critical skill for any organization, and it is one that can be taught and learned. By following these steps, organizations can effectively identify and solve problems, and they can ensure that they are always prepared to face whatever challenges the future may bring.
